

Securline® Blood Band

1 SecurSnap® Closure

The wristband features PDC's unique SecurSnap closure, which provides maximum security. It easily snaps together (even when personnel wear gloves), providing greater ease of use over other blood band styles.

2 Easy-to-Read Data Area

Information on the Blood Band is easier to read than other blood band styles, reducing the chance of a medical error. Patient data can be handwritten on the clear white label area, which is larger than competitive wristbands. Once the label is removed, a "carbonless" copy of each patient's information remains on the band.

3 Efficient Easy-Peel Labels

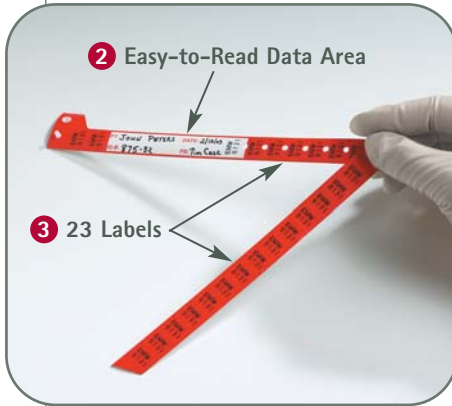

The wristband features 23 easy-peel labels, allowing medical personnel to quickly track and identify specimens and crossmatch them to the correct patient. The Securline Blood Band has more identification labels than any other style of blood band. Labels conveniently remain on the wristband for use with paperwork and medical charts.

Alpha and Numeric Serialization

The wristband features both alpha and numeric serialization on each label, reducing the possibility of human error in mismatching blood specimens.

Convenient Packaging

The product is packaged in cases of 150 (15 easy-to-use dispenser boxes of 10 wristbands). Each box includes an extender band in the event the wristband needs to be applied to a patient's leg or to a larger sized person.

Securlink® Blood Recipient System

Another option is our Securlink Blood Recipient System which links the patient, transfused blood, and all related paperwork for accurate and complete blood transfusion. The system includes

an ID wristband with insert card, a sheet of 16 pre-numbered labels, and a specimen tube label. The wristband is made of soft vinyl, and features our tamperproof SecurSnap® fastener.

The Securline Blood Band and Securlink System

are part of an extensive line of identification wristbands from Precision Dynamics Corporation. We also offer:

- Bar Code Wristbands
- Mother-Infant Wristbands
- Insert Wristbands
- Write-On Bands
